

# We make Efficient, Sustainable Buildings possible.

From lighting retrofits and weatherization improvements to building automation controls and HVAC upgrades and maintenance, **EMCOR companies offer a variety of sustainable solutions and efficiency technologies that help clients save energy and reduce their environmental impact.**

## OUR SUSTAINABILITY AND EFFICIENCY SOLUTIONS:

- Energy audits and upgrades
- LED lighting installations and retrofits
- High-efficiency HVAC installation
- Mechanical system efficiency retrofits
- Building automation and controls
- Critical equipment monitoring
- Renewable energy systems
  - Solar/photovoltaic
  - Wind
  - Fuel-cell
  - Biomass and biofuel
  - Landfill gas and waste-to-energy
- EV charging stations and infrastructure
- LEED certification
- Water and wastewater conservation
- Building envelope improvements and weatherization
- Rebate consulting

## HELPING COMPANIES SHRINK THEIR CARBON FOOTPRINT

**62 percent cut in energy consumption** at a manufacturing plant thanks to new building controls.

# 100% NET ZERO

Innovative HVAC project helped a non-profit HQ transform into a **100-percent net zero facility.**

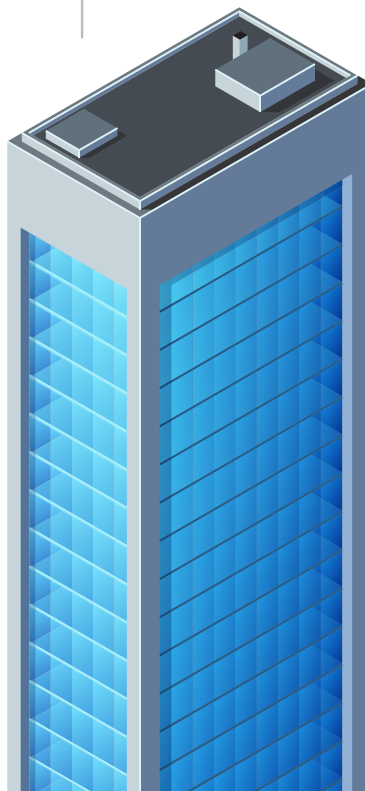

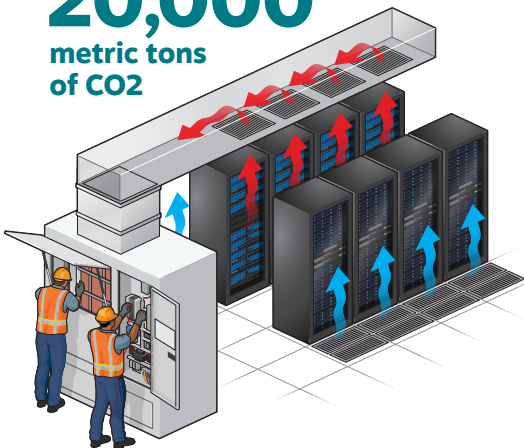

### Annual Savings

# \$1M

High-efficiency central plant will generate \$1 million in annual savings for high rise.

HVAC and lighting improvements across 900-site bank portfolio **offset**

# 20,000 metric tons of CO2

## Let's make it possible for you.
