EMCOR GROUP, INC. PROJECT RECEIVES ENVIRONMENTAL PROTECTION AGENCY “2009 PROJECT OF THE YEAR” AWARD

NORWALK, CONNECTICUT, February 2, 2010 - EMCOR Group, Inc. (NYSE: EME), a Fortune 500® leader in mechanical and electrical construction, energy infrastructure and facilities services for a diverse range of businesses, is pleased to announce that a project recently completed for the University of New Hampshire by its EMCOR Energy Services unit, the EcoLine™ Project, has been named the “2009 Project of the Year” by the U.S. Environmental Protection Agency’s (EPA) Landfill Methane Outreach Program. This Program annually recognizes landfill methane capture projects for innovation in generating renewable energy and reducing greenhouse gas emissions. The EcoLine™ Project was completed at the University’s main campus in Durham, New Hampshire.

The EcoLine™ Project converts landfill gas into a medium BTU quality gas, which is then used to produce environmentally clean electric power for both the University of New Hampshire and the local electrical grid. EMCOR Energy Services’ (EES) scope of work included the engineering design, procurement, construction management, construction installation and commissioning associated with a new turbine generator, gas compressor and all ancillary equipment, as well as modification of the existing University of New Hampshire power plant equipment, to operate on processed landfill gas.

“We are pleased to have played an integral role in this important and innovative project for the University, and we are proud of the recognition it has received,” said Art Strenkert, President, EMCOR Energy Services. “This award is particularly gratifying to EES, because it is the second project in two years where we have performed a significant scope of work on a project that was then recognized by the EPA--the first project was in 2007 for one of the largest landfill gas projects in the country, in Pennsylvania.”

Ranked in the top five percent for energy efficiency among colleges and universities by the U.S. Department of Energy, the University of New Hampshire is one of the nation’s leading sustainable universities. Additionally, the University of New Hampshire was also recently named by the Princeton Review as one of the top 11 sustainable universities in the nation.

About EMCOR Group, Inc.

A Fortune 500 company with estimated 2009 revenues of \$5.5 - \$5.6 billion, EMCOR Group, Inc. (NYSE: EME) is a global leader in mechanical and electrical construction, energy infrastructure, and facilities services. A leading provider of critical infrastructure systems, EMCOR gives life to new structures and sustains life in existing ones by its planning, installing, operating, maintaining, and protecting the sophisticated and dynamic systems that create facility environments---such as electrical, mechanical, lighting, air conditioning, heating, security, fire protection, and power generation systems---in virtually every sector of the economy and for a diverse range of businesses, organizations and government. EMCOR represents a rare combination of broad reach with local execution, combining the strength of an industry leader with the knowledge and care of 170 locations. The 26,000 skilled employees of EMCOR have made the company, in the eyes of leading business publications, amongst the "World's Most Admired" and "Best Managed". EMCOR's diversity---in terms of the services it provides, the industries it serves and the geography it spans---has enabled it to create a stable platform for sustained results. The Company's strong financial position has enabled it to attract and retain among the best local and regional talent, to undertake and complete the most ambitious projects, and to redefine and shape the future of the construction and facilities services industry. Additional information on EMCOR can be found at www.EMCORGroup.com.

This release may contain certain forward-looking statements within the meaning of the Private Securities Reform Act of 1995. Any such comments are based upon information available to EMCOR management and its perception thereof, as of this date, and EMCOR assumes no obligation to update any such forward-looking statements. These forward-looking statements may include statements regarding market opportunities, market share growth, gross profit, backlog mix, projects with varying profit margins, and selling, general and administrative expenses. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. Accordingly these statements are no guarantee of future performance. Such risk and uncertainties include, but are not limited to, adverse effects of general economic conditions, changes in the political environment, changes in the specific markets for EMCOR's services, adverse business conditions, availability of adequate levels of surety bonding, increased competition, unfavorable labor productivity and mix of business. Certain of the risks and factors associated with EMCOR's business are also discussed in the Company's 2008 Form 10-K, its Form 10-Q for the third quarter ended September 30, 2009, and in other reports filed from time to time with the Securities and Exchange Commission. All these risks and factors should be taken into account in evaluating any forward-looking statements.
