

We make
→ **High-Tech
Manufacturing
possible.**

Whether repairing sophisticated laboratory ventilation or constructing a new semiconductor or battery plant from the ground up, **EMCOR companies have experience working in some of the most complex, high-tech manufacturing and research environments.**

With locations nationwide, you can count on our companies for a comprehensive range of mechanical, electrical, fire protection, and building services tailored to the needs of your state-of-the-art, technology-rich facilities.

**EXPERIENCE IN MULTIPLE
MAJOR MARKETS:**

Biotech and Life Sciences

- Pharmaceutical research, production, and preparation
- Biological products
- Laboratories
- Research and Development Facilities

Technology

- Semiconductors
- Electronic components and equipment
- Computers
- Batteries

Manufacturing

- Heavy manufacturing
- Automobiles
- Electric vehicles (EVs)
- Chemicals and petrochemicals
- Textiles and paper products
- Food processing

Mechanical

Our companies can provide complete mechanical and HVAC systems, as well as fabrication solutions, for manufacturing and industrial plants.

Further, many EMCOR companies are familiar with the strict quality requirements of clean room environments and have expertise in the unique systems commonly found in laboratory or research facilities such as process piping, medical gas, chemical fume hoods, and more.

Electrical

With the capability to deliver everything from low-voltage and telecom systems to end-to-end power transmissions and distribution, EMCOR companies are the high-tech sector's go-to source for electrical solutions.

Some of our companies also have experience providing specialty electrical solutions—including plant robotics and automation, as well as automated storage and retrieval systems—and can complete electrical connections for your equipment, no matter the complexity.

Fire Protection

From life-saving pharmaceutical research to the latest EV developments, the products and equipment housed in high-tech manufacturing facilities are invaluable—we understand how vital it is to keep them safe.

Our fire protection companies offer the latest in fire detection, alarm, and suppression, including solutions precisely designed to protect your unique equipment such as CO2, clean agent, dry chemical, and other specialty systems.

Building Services

EMCOR companies offer 24/7/365 on-site mechanical and electrical systems support, as well as emergency and after-hours services. They have familiarity with working in tightly controlled environments with complex equipment and are ready to help your laboratory or plant maintain the most precise conditions.

Plus, they have the capacity to monitor and maintain even the largest nationally dispersed multi-site portfolios.

Let's make it possible for you.
