

Mission-critical Data Centers

+ ELECTRICAL CONSTRUCTION

Skilled teams. Proven expertise. Mission-critical results.

Whether installing thousands of feet of electrical duct bank or designing highly redundant back-up power systems, EMCOR Group companies have the capacity to provide end-to-end electrical construction for mission critical data centers.

Building Data Centers from the Ground Up, for Clients Nationwide

Our companies can plan, design, install, maintain, and retrofit a full range of sophisticated data center infrastructure and power generation systems. Their teams include highly skilled project managers, engineers, and BIM and CAD professionals, working together to meet demanding mission-critical construction requirements.

EMCOR Group companies are part of a national network of specialists, including some of the country's most experienced providers of construction solutions for data centers. With decades of combined knowledge and exceptional safety standards, our companies help build, power, service, and protect data centers capable of keeping up with the furious pace of cloud-based businesses and big-data firms.

Mission-critical support at every stage.

COMPLETE DATA CENTER SUPPORT

- Infrastructure design-build
- Extensive remote prefabrication facilities
- High- and low-voltage construction
- Cabling and ductwork
- Electrical distribution
- AC/DC power
- Switchyards and switchgears
- Cogeneration
- Power generation facilities
- Substations
- Diesel generators
- Uninterruptible power supply systems
- Network design, installation, and integration
- Fiber optics
- Riser management
- Customized maintenance
- 24/7/365 emergency service
