

HEALTHCARE CAPABILITIES

The Specialized Expertise Medical and Biotech Facilities Demand

From building a new multi-story patient wing to maintaining air quality in a medical research center to providing janitorial services for a portfolio of clinics, EMCOR Group companies have extensive experience in the healthcare industry. We understand the strict regulatory requirements of these environments, as well as their unique business and patient needs.

Trusted by the Best

Our teams have completed well over 2,000 healthcare, biotech, and pharmaceutical projects across the country, working with eight of the top ten U.S. hospitals. These organizations have earned a reputation for quality and care. They count on us to deliver the same.

Specialized Expertise. Specialized Solutions

EMCOR companies are prepared to follow the strict federal and local regulations that govern medical facilities, as well as your unique procedures—from maintaining negative air space to complying with processes for debris removal, infection control, and even employee attire.

Capabilities Nationwide

With locations coast-to-coast, EMCOR Group companies are engaged with healthcare projects throughout the country. Name your healthcare challenge, we have the team that can build, power, service, and protect it.

**You handle patient care.
We'll handle the rest.**
