

# Mission-critical Data Centers + FIRE PROTECTION

## Skilled teams. Proven expertise. Mission-critical results.

EMCOR Group companies design and install some of the most sophisticated fire suppression and detection equipment. Our expertise spans from wet pipe and pre-action sprinklers to specialty systems, like inert gas, adapted to sensitive data center environments.

### Specialized Fire Protection Solutions for Data Centers Nationwide

EMCOR Group companies are part of a national network of specialists, including some of the most experienced providers of data center fire protection solutions in the country. They utilize CAD and hydraulic calculation software to help improve accuracy in order to meet both code requirements and stakeholder objectives.

Their teams can also upgrade older systems and integrate them into digitally managed emergency power frameworks. With decades of combined knowledge and exceptional safety standards, our companies help build, power, service, and protect data centers capable of keeping up with the furious pace of cloud-based businesses and big-data firms.

### Mission-critical support at every stage.

#### COMPLETE DATA CENTER SUPPORT

Backflow preventers  
Wet and dry sprinklers

Pre-action and deluge systems  
Foam systems

Fire equipment repair

System monitoring  
CO2 systems

Special hazards and fire suppression systems

Clean agent systems

Fire alarms and detection systems  
High-speed and ultra-high-speed detection systems

Fire service reports

Water storage tanks

Standpipe and fire hose systems

Smoke detector sensitivity testing

Dry chemical systems

Halon replacement systems

Fire sprinkler testing, repair, and service

Maintenance and inspection

Fire pumps

Antifreeze

Fabrication
