

→ FIRE PROTECTION SERVICES

We make Hyper-Scale Data Centers possible.

MISSION-CRITICAL SERVICES

- Backflow preventers
- Wet and dry sprinklers
- Pre-action and deluge systems
- Foam systems
- Fire equipment repair
- System monitoring
- CO2 systems
- Special hazards and fire suppression systems
- Clean agent systems
- Fire alarms and detection systems
- High-speed and ultra-high-speed detection systems
- Fire pumps
- Water storage tanks
- Antifreeze
- Standpipe and fire hose systems
- Smoke detector sensitivity testing
- Dry chemical systems
- Halon replacement systems
- Fire sprinkler testing, repair, and service
- Fire service reports
- Fabrication
- Maintenance and inspection

EMCOR Group companies design and install some of the most sophisticated fire suppression and detection equipment. Our expertise spans from wet pipe and pre-action sprinklers to specialty systems, like inert gas, adapted to sensitive data center environments.

Specialized Fire Protection Solutions for Data Centers Nationwide

EMCOR Group companies are part of a national network of specialists, including some of the most experienced providers of data center fire protection solutions in the country. They utilize CAD and hydraulic calculation software to help improve accuracy in order to meet both code requirements and stakeholder objectives.

Their teams can also upgrade older systems and integrate them into digitally managed emergency power frameworks. With decades of combined knowledge and exceptional safety standards, our companies help build, power, service, and protect data centers capable of keeping up with the furious pace of cloud-based businesses and big-data firms.

*Let's make **WHAT'S NEXT**
possible for you.*
