

# Shambaugh & Son

## Offering Complete Fire Inspection, Testing, Service, & Repair Across the Nation

Protecting people, places, and things  
for clients who understand that the  
real disaster is not being prepared.

# **Shambaugh & Son**

*An EMCOR Company*

## Performing Life Safety Inspections and Service in all 50 States.

### Fire Service and Repair. For Nearly Any Type of Equipment.

Shambaugh offers fire service and repair options for:

- » Backflow preventers
- » Wet and dry sprinklers
- » Pre-action and deluge systems
- » Underground fire mains and hydrants
- » Foam systems
- » Wet and dry chemical systems
- » CO<sub>2</sub> systems: gaseous agents
- » Special hazards and fire suppression systems
- » Clean agent systems
- » High-speed and ultra-high-speed detection systems
- » Water storage tanks
- » Standpipe and fire hose systems
- » Halon replacement systems
- » Fire alarms and detection systems
- » Fire pumps
- » Smoke detector (sensitivity testing)
- » UL testing of sprinkler heads
- » All NFPA 25 required inspections

Over the past 50 years, Shambaugh & Son. L.P. (Shambaugh) has earned a reputation as one of the top fire protection contractors in the industry. With over 75 fire specialists that are National Institute for Certification in Engineering Technologies (NICET)-certified, Shambaugh has both the experience and deep knowledge required to provide one-of-a-kind fire services that consistently meet the changing needs of clients.

With at least one representative on each of 25 National Fire Protection Association (NFPA) committees, Shambaugh not only understands the Codes, but also works to develop them! For clients across the nation, Shambaugh provides and integrates life safety solutions, including fire detection systems, suppression systems, and even the most advanced security technologies available today. Because keeping fire and security equipment in top working order doesn't just give clients reassurance that they're protected, it also helps prevent threats to life safety, the destruction of property, unplanned downtime costs, and unforeseen increases in insurance premiums.

Shambaugh's certified inspectors and licensed life safety consultants are on call 24/7/365 to test, repair, and upgrade equipment to help keep it functioning at its absolute highest level.

### Don't Just Rest, Rest Assured.

Fire. Power failure. Security breach. Even a minor incident can threaten a business. Statistics show that the most prepared organizations recover within 24 hours, but the least prepared are down for more than a month. Shambaugh collaborates with clients to develop the right solutions to help ensure that people, facilities, and businesses are prepared to survive a disaster.

### Small Projects, Large Projects, And Everything In Between.

Shambaugh's fire services team can handle small or large service projects—and everything in between. For immediate, emergency repair needs, Shambaugh's fire service team can respond anytime, day or night. One of the key benefits to working with Shambaugh is 24/7/365 telephone availability for consulting or diagnosing system issues before mobilizing to a site. This helps enable Shambaugh to send the right team the first time—virtually eliminating the risk of inefficiency.

## Building and Fire Service Reports, By Certified Fire Technicians.

Shambaugh distinguishes itself by offering clients comprehensive, scan-ready Building Reports. Technicians place bar codes on every piece of fire protection equipment onsite and scan inventory into a comprehensive database. This allows clients to log in to their customized portal on Shambaugh's website and check the dashboard at their convenience, in order to manage their equipment for service and inspection needs, and help manage fire inspection schedules. Building reports also provide clients with numerous advantages and opportunities, including detailed explanations regarding:

- » Monitoring of what has been inspected
- » Viewing of inspection outcomes
- » Staying up to date on required Inspection Frequencies
- » Service bulletins on equipment recalls
- » Inspection repairs and replacements
- » Streamlining of fire equipment monitoring
- » Providing value—added transparency
- » Enabling one destination for all clients' reporting needs and one central location for complete inventory management

## The Best Equipment Is Inspected Equipment.

Routine inspections on all fire protection equipment are critical. Shambaugh fire experts can inspect alarms and fire detection equipment, special hazard devices, underground fire mains and hydrants, water storage tanks, and a full range of other specialty and essential equipment. Technicians also conduct tests to continuously comply with NFPA, state, and local codes.

## Fire Sprinklers to Fire Alarms & More, Shambaugh Does It All.

Comprehensive testing of all on-site sprinklers and extinguishers guards against surprise defects and helps ensure safe, reliable operation in case of emergency. Regular testing also helps ensure fire code compliance, which helps avoid fines and costly unplanned upgrades.

## Complete Fire Protection Design, Fabrication, and Installation.

Shambaugh is a single-source, fire protection design, fabrication, installation and service contractor, offering a one-stop solution for clients that's in accordance with owner expectations, quality engineering practices, local codes/rules/regulations, and plant and industry requirements.
