EMCOR is one of the most skilled and expert providers in the country of data center building services. With decades of experience and knowledge—and one of the best safety records in the industry—EMCOR's accomplished national network of specialists helps build, power, service, and protect sophisticated data centers that keep up with the furious pace of cloud-based businesses and big-data firms.

EMCOR provides 24/7/365 on-site mechanical and electrical systems support, as well as emergency and after-hours services, at numerous major data centers across the U.S. The scope of work EMCOR provides for these data centers includes construction, maintenance, and energy management services for a wide range of equipment, including centrifugal chillers, heat pumps, and rooftop and computer-room air-conditioning and direct-expansion units.

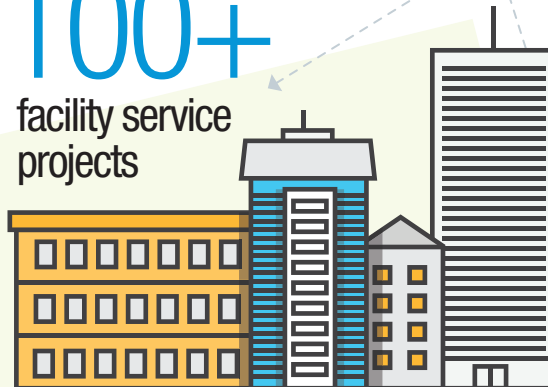

EMCOR companies have completed **875+ mission critical data center projects** since 2006, including

**450+**  
electrical projects

**250+**  
mechanical projects

**100+**  
facility service projects

**75+**  
FIRE PROJECTS

Build. Power. Service. Protect.
